Our Company

Veron Coating Systems was founded in 1995 with the goals of combining quality products with thorough application know-how assuring that Veron Coating's customers get their jobs done correctly and efficiently with the highest quality products available.

Veron Coating's floor coating systems have been developed through a judicious blending of up-to-the-minute laboratory science with the field experience of technicians who for decades have worked hands-on with resins, polymers and concrete. This blending results in products that are innovative in design, environmentally safe, consistent in performance and that meet the needs of the marketplace.

Veron Coatings currently manufactures a stable of floor coatings and systems spread among Acrylic and Acrylic Urethane, Polyurethane, Epoxy, Patio and Deck Polymer Modified Concrete and Concrete Sealers and Stains. Product information along with a gallery of coatings applications is available on this website, www.veroncoatings.com and amazingly comprehensive product information is available on request on CD-ROM.
